

BEREKET TESFAYE GETIE

Computer Science Student | JUNIOR Full Stack Web Developer | Software Engineering

 Lalibela, Ethiopia  berekettesfayegetie89@gmail.com	LinkedIn GitHub Portfolio
--	---

PROFESSIONAL SUMMARY

A highly motivated and academically distinguished 3rd-year Computer Science student at Woldia University (School of Computing), expected to graduate in 2026/2027 with a Cumulative GPA of 3.65/4.00 — earning First Class with Distinction. Possessing hands-on experience in designing, developing, and deploying full-stack web applications using modern frontend and backend technologies including React, Next.js, Node.js, PHP, and MySQL. Demonstrates a strong command of software engineering principles, database management, and UI/UX design. Driven by an innate passion for problem-solving and a commitment to building scalable, user-centric digital solutions. Proven ability to learn rapidly, adapt to evolving technology stacks, and collaborate effectively within team environments. Actively seeking internships, graduate programs, and software engineering roles where technical expertise and intellectual curiosity can drive meaningful impact.

EDUCATION

Bachelor of Science in Computer Science	2023 – 2026/2027 (Expected)
--	-----------------------------

Woldia University, School of Computing | Lalibela, Ethiopia

Current Year:	3rd Year (Year III of IV)
Cumulative GPA:	3.65 / 4.00 (First Class with Distinction)
Academic Standing:	First Class — Top-tier academic classification
Student ID:	WDU162627
Program:	Regular Degree — Full-Time

Key Courses with Strong Academic Performance:

- Programming 1 and 2 — Grade: -A and A | Credit Hours: 5
- Data structure and Algorithm— Grade: A | Credit Hours: 5
- Software Engineering (CoSc3061) — Grade: A | Credit Hours: 5
- Java Programming (CoSc3053) — Grade: A+ | Credit Hours: 5
- Web Programming (CoSc3081) — Grade: A | Credit Hours: 7
- Operating Systems (CoSc3023) — Grade: A+ | Credit Hours: 5
- Microprocessor & Assembly Language Programming (CoSc3025) — Grade: A- | Credit Hours: 5
- Automata and Complexity Theory (CoSc3101) — Grade: A- | Credit Hours: 5

TECHNICAL SKILLS

Programming Languages	Python · JavaScript · PHP · Java · C++ Proficient in writing clean, efficient code across multiple paradigms — OOP, functional, and procedural.
Frontend Development	HTML5 · CSS3 · Bootstrap · Tailwind CSS · React · Next.js Experienced in building responsive, accessible, and visually polished UIs

	with component-based architecture.
Backend Development	Node.js · PHP Skilled in designing RESTful server-side logic, session management, authentication systems, and API integration.
Databases	MySQL · PostgreSQL · MongoDB Competent in schema design, query optimization, relational modeling, and working with NoSQL document stores.
Tools & Platforms	Git · GitHub · VS Code · XAMPP · Figma Comfortable with version control workflows, collaborative development pipelines, and UI/UX prototyping.

PROJECTS

Personal Portfolio Website	<i>React · Next.js · Tailwind CSS</i>
-----------------------------------	---------------------------------------

Live: <https://beki-portfolio-lac.vercel.app/>

Designed and developed a fully responsive personal portfolio website to professionally showcase technical projects, skills, and contact information to potential employers and clients. The site features a modern UI/UX design language with smooth navigation, optimized performance, and SEO-friendly architecture.

- Engineered with React and Next.js using server-side rendering for performance and discoverability
- Styled with Tailwind CSS for a pixel-perfect, mobile-first responsive layout
- Integrated a functional contact section for professional inbound communication
- Deployed on Vercel with CI/CD pipeline ensuring continuous availability
- Demonstrates personal brand, technical competence, and design sensibility

E-Commerce Platform	<i>React · JavaScript · Tailwind CSS</i>
----------------------------	--

Live: <https://beki-ecommerce-oy9z.vercel.app/>

Developed a fully functional frontend e-commerce application simulating a real-world online retail experience. The platform showcases product catalog management, dynamic filtering, and a seamless user journey from product discovery to checkout flow.

- Built dynamic product listing and filtering components using React state management
- Implemented responsive grid layouts and intuitive UX patterns using Tailwind CSS
- Architected reusable UI components for scalability and maintainability
- Focused on performance optimization including lazy loading and optimized asset delivery
- Deployed on Vercel with production-ready build configuration

Student Grade Management System	<i>PHP · MySQL · Bootstrap · JavaScript</i>
--	---

Live: <https://studentgradesystem.free.nf/>

Architected and implemented a comprehensive academic management system designed to streamline grade administration for educational institutions. The system supports multi-role access for students and instructors, integrating a secure backend with a responsive frontend.

- Developed a secure role-based authentication system with session management for students and instructors

- Built CRUD operations for student records, course enrollment, and grade entry using PHP and MySQL
- Designed normalized relational database schema ensuring data integrity and efficient querying
- Implemented automated grade calculations and academic performance reporting features
- Delivered a responsive user-friendly interface with Bootstrap ensuring cross-device compatibility
- Applied server-side validation and SQL injection prevention for application security

CORE STRENGTHS

Problem Solving Approaches complex technical challenges systematically, breaking them into structured, manageable components.	Team Collaboration Works effectively within cross-functional teams, contributing proactively and respecting diverse perspectives.
Fast Learning Ability Rapidly acquires and applies new programming languages, frameworks, and tools in academic and project contexts.	Adaptability Thrives in dynamic environments with changing requirements, demonstrating flexibility across technology stacks.
Communication Skills Articulates technical concepts clearly to both technical and non-technical stakeholders.	Analytical Thinking Employs data-driven reasoning and logical analysis to evaluate solutions and optimize outcomes.
Software Dev Best Practices Applies clean code principles, version control, modular design, and testing discipline in all work.	Continuous Learning Proactively pursues certifications, online courses, and personal projects to stay at the forefront of technology.

LANGUAGES

Amharic	Native / Mother Tongue — Full professional and conversational proficiency
English	Professional Working Proficiency — Reads, writes, and communicates effectively in technical and academic English

CAREER OBJECTIVE

To establish a distinguished career as a professional Software Engineer by leveraging a strong academic foundation in Computer Science and hands-on full-stack development experience. I aspire to contribute meaningfully to innovative technology teams — building scalable, high-performance applications that create genuine user and business value. My immediate objective is to secure a competitive internship or graduate program placement where I can apply my skills in modern web technologies, deepen my expertise in software architecture and system design, and accelerate my professional growth under experienced mentors. Long-term, I aim to evolve into a senior engineering

role or technical leadership position, contributing to impactful digital products, open-source communities, and technology advancement within Ethiopia and internationally.
